# ATOM SONIC

**Super-Sized. Super-Charged.  
Super-Sonic! Meet the NEW skyVac® Atom  
Sonic. It's got lots more of the good stuff!**

The dual motor 2800Watt system delivers the perfect suction mix to take on the full range of gutter cleans. 110" water lift muscle, combined with 7166 LPM air flow, gets the job done fast!

The unique powerful blow function is ideal for cleaning up after roof cleaning projects. A quick and easy way to blast those mossy crumbs off the tiles. Or use to shift those pesky pine needles or debris trapped in gutter corners.

The compact vacuum head is designed to maximise the drum capacity. The filter is housed behind a protective steel plate that lines up with the 50mm cyclonic entry port, to minimise blockages and guide debris around the drum. This steel plate deflects dirt and debris, and doubles as a sturdy vac head stand. The cleated filter cartridge is removable and easy to clean. To empty, simply unclip and remove the vac head and tip out the contents that have collected in the light weight steel drum (6.5kg Empty).

The 45L drum is mounted on 4 multi directional castors making it easy to manoeuvre around properties, and at 17.2kg, can easily be lifted in and out of the van. For secure parking, the Atom Sonic now features two lockable wheels – ideal for hills and keeping in place during transit.

## IDEAL FOR:

- Gutter cleaning (up to 4 storeys high)
- High-reach vacuuming (Internal & External)
- Moss & pine needles blowing out of gutters (Blow function added)
- Uneven surfaces (two lockable wheels – ideal for keeping in place during transit)
