FROM THE GROUND

EVERYDAY DOMESTIC & COMMERCIAL USE

The skyVac® Nitro is our most powerful vacuum yet! With the perfect mix of Airflow and Water Lift, this gutter vacuum is the ultimate machine.

Optimum Suction Power:

This gutter cleaning machine has bags of power. For the best combination of suction, this vacuum is uniquely engineered to provide a 112” Water Lift and 13,900 LPM Airflow!

The compact vacuum head maximises the drum capacity of 78 litres. The filter sits behind a protective steel plate that lines up with the 50mm cyclonic side entry port to minimise blockages and guide debris around the drum.

Hardwearing Steel Drum:

The skyVac® Nitro has a sturdy, steel drum. The drum is mounted on a robust steel trolley with oversized all-terrain rear wheels for maximum stability on uneven terrains. The trolley is easy to steer with the multi-directional front castors. These castors also come with a locking feature, enabling you to “park” your vacuum on slopes and hills.

Effective Waste Management:

The drum features a drain hose and a waste sieve basket for a “user-friendly” approach to waste disposal. The sieve basket catches larger debris as it enters the tank, allowing any liquid to separate and settle at the bottom. This liquid can instantly be emptied into the drains with the drain hose, allowing you to dispose of waste easily.

IDEAL FOR:

- Gutter cleaning (up to 4 storeys high)
- For gutter cleaning both commercial and domestic premises
- From top up cleans to stubborn gutter blockages
- Easy debris removal
